

SAFETY DATA SHEET

Republic of Korea

In accordance with the Standard for Classification and Labeling of Chemical Substance and Safety Data Sheet, Article 10 Paragraph 1

Section 1. Chemical product and company identification

| | |
|------------------|---|
| A. Product name | AdvanceSTEM™ ES Qualified, Non-Essential Amino Acids Solution (100X), PROMO |
| Catalogue Number | SH30853.01PM |
| Article Number | 29240016 |

B. Recommended use of the chemical

For Further Manufacturing or Research Use. Not for Diagnostic or Therapeutic Use.

Restrictions on use

| Uses advised against | Reason |
|----------------------|--------|
| Consumer use | - |

C. Supplier's information

| | | |
|--------------|---|---|
| Manufacturer | HyClone Laboratories 925 West 1800 South | Cytiva Austria Kremplstr. 5 4061 Pasching AUSTRIA Phone: +43 7229 64865 Fax (+43) 7229 64866 |
| Supplier | Logan, Utah 84321 Phone: (435) 792-8000 | |

Cytiva Singapore
1 Maritime Square #13-01
Harbourfront Centre
Singapore 099253

Distributor 유통업자 글로벌 라이프 사이언스 솔루션즈 코리아 유한회사
BRC BLDG., 2동 2층
송도미래로 9, 연수구

Emergency telephone number +82-2-3478-4584
(with hours of operation) (9.00 am - 6.00 pm)

Section 2. Hazards identification

| | |
|--------------------------|--|
| A. Hazard classification | CORROSIVE TO METALS - Category 1 SKIN CORROSION - Category 1 SERIOUS EYE DAMAGE - Category 1 This product is classified in accordance with the Industrial Safety and Health Act and the Chemical Control Act. |
|--------------------------|--|

B. GHS label elements, including precautionary statements

Symbol

Signal word Danger

Hazard statements May be corrosive to metals.
Causes severe skin burns and eye damage.

Precautionary statements

| | |
|---|--|
| Prevention | Wear protective gloves, protective clothing and eye or face protection. Keep only in original packaging. Wash thoroughly after handling. |
| Response | Absorb spillage to prevent material damage. IF INHALED: Remove person to fresh air and keep comfortable for breathing. Immediately call a POISON CENTER or doctor. IF SWALLOWED: Immediately call a POISON CENTER or doctor. Rinse mouth. Do NOT induce vomiting. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water. Immediately call a POISON CENTER or doctor. Wash contaminated clothing before reuse. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor. |
| Storage | Store locked up. Store in a corrosion resistant container with a resistant inner liner. |
| Disposal | Dispose of contents and container in accordance with all local, regional, national and international regulations. |
| C. Other hazards which do not result in classification | None known. |

Section 3. Composition/information on ingredients**Substance/mixture** Mixture**Other means of identification** Not available.

| Ingredient name | Common name | Identifiers | % |
|------------------------|--------------------|--------------------|----------|
| hydrochloric acid | | CAS: 7647-01-0 | ≤5 |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

| | |
|-----------------------------------|---|
| A. Eye contact | Get medical attention immediately. Call a poison center or physician. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician. |
| B. Skin contact | Get medical attention immediately. Call a poison center or physician. Wash contaminated skin with soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician. Wash clothing before reuse. Clean shoes thoroughly before reuse. |
| C. Inhalation | Get medical attention immediately. Call a poison center or physician. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |
| D. Ingestion | Get medical attention immediately. Call a poison center or physician. Wash out mouth with water. Remove dentures if any. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Chemical burns must be treated promptly by a physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |
| E. Notes to physician | Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. |
| Specific treatments | No specific treatment. |
| Protection of first-aiders | No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

See toxicological information (Section 11)**Section 5. Fire-fighting measures****A. Extinguishing media****Suitable** Use an extinguishing agent suitable for the surrounding fire.**Not suitable** None known.**B. Specific hazards arising from the chemical** In a fire or if heated, a pressure increase will occur and the container may burst.**Hazardous thermal decomposition products** No specific data.

C. Special protective equipment for fire-fighters Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Special precautions for fire-fighters Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

Section 6. Accidental release measures

- A. Personal precautions, protective equipment and emergency procedures** No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Do not breathe vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.
- B. Environmental precautions** Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

C. Methods and materials for containment and cleaning up

- Small spill** Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Absorb spillage to prevent material damage. Dispose of via a licensed waste disposal contractor.
- Large spill** Stop leak if without risk. Move containers from spill area. Absorb spillage to prevent material damage. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). The spilled material may be neutralized with sodium carbonate, sodium bicarbonate or sodium hydroxide. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

A. Precautions for safe handling

- Protective measures** Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
- Advice on general occupational hygiene** Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
- B. Conditions for safe storage, including any incompatibilities** Store between the following temperatures: 2 to 8°C (35.6 to 46.4°F). Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store in a corrosion resistant container with a resistant inner liner. Store locked up. Separate from alkalis. Keep away from metals. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

Section 8. Exposure controls/personal protection

A. Control parameters

Occupational exposure limits

Ingredient name

Hydrochloric acid

Exposure limits

ISHA Article 42 (Republic of Korea, 1/2020)

TWA 8 hours: 1 ppm.

STEL 15 minutes: 2 ppm.

Biological exposure indices

No exposure indices known.

Exposure limits

B. Appropriate engineering controls

If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

Environmental exposure controls

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

C. Personal protective equipment

Respiratory protection

Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

| | |
|-------------------------|--|
| Eye protection | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles and/or face shield. If inhalation hazards exist, a full-face respirator may be required instead. |
| Hand protection | Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. |
| Skin protection | Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. |
| Hygiene measures | Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location. |

Section 9. Physical and chemical properties

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

A. Appearance

| | |
|--|-----------------|
| Physical state | Liquid. |
| Color | Clear. |
| B. Odor | Not available. |
| C. Odor threshold | Not available. |
| D. pH | 1 to 1.7 |
| E. Melting/freezing point | Not available. |
| F. Boiling point or initial boiling point and boiling range | Not available. |
| G. Flash point | Not available. |
| Fire point | Not available. |
| Burning time | Not applicable. |
| Burning rate | Not applicable. |
| H. Evaporation rate | Not available. |
| I. Flammability (solid, gas) | Not available. |
| J. Lower and upper explosive (flammable) limits | Not available. |
| K. Vapor pressure | Not available. |

Vapor Pressure at 20°C

| Ingredient name | mm Hg | kPa | Method |
|-----------------|-------|-----|--------|
| water | 17.5 | 2.3 | |

Vapor pressure at 50°C

| mm Hg | kPa | Method |
|-------|-----|--------|
| | | |

| | |
|--|-----------------|
| L. Solubility in water | Not available. |
| M. Vapor density | Not available. |
| N. Relative density | Not available. |
| O. Partition coefficient: n-octanol/water | Not applicable. |
| P. Auto-ignition temperature | Not available. |
| Q. Decomposition temperature | Not available. |
| SADT | Not available. |
| R. Viscosity | Not available. |
| Flow time (ISO 2431) | Not available. |
| S. Molecular weight | Not applicable. |

Particle characteristics

| | |
|-----------------------------|-----------------|
| Median particle size | Not applicable. |
|-----------------------------|-----------------|

Section 10. Stability and reactivity

- A. **Chemical stability** The product is stable.
- Possibility of hazardous reactions** Under normal conditions of storage and use, hazardous reactions will not occur.
- B. **Conditions to avoid** No specific data.
- C. **Incompatible materials** Attacks many metals producing extremely flammable hydrogen gas which can form explosive mixtures with air.
Reactive or incompatible with the following materials:
alkalis
metals
- D. **Hazardous decomposition products** Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Section 11. Toxicological information

A. Information on the likely routes of exposure

Routes of entry anticipated: Oral, Dermal, Eyes.

Potential acute health effects

- Respiratory** No known significant effects or critical hazards.
- Oral** No known significant effects or critical hazards.
- Skin** Causes severe burns.
- Eyes** Causes serious eye damage.

Over-exposure signs/symptoms

- Inhalation** No specific data.
- Ingestion** Adverse symptoms may include the following:
stomach pains
- Skin contact** Adverse symptoms may include the following:
pain or irritation
redness
blistering may occur
- Eye contact** Adverse symptoms may include the following:
pain
watering
redness

B. Health hazards

Acute toxicity

| Product/ingredient name | Result |
|-------------------------|---|
| Hydrochloric acid | Rat - Inhalation - LC50 Gas. 3124 ppm [1 hours] <u>Toxic effects:</u> Olfaction - Other changes Eye - Iritis |

E. Other adverse effects

No known significant effects or critical hazards.

Section 13. Disposal considerations

A. Disposal methods

The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

B. Disposal precautions

This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information

UN

Section 15. Regulatory information**A. Regulation according to ISHA**

ISHA article 117 (Harmful substances prohibited from manufacture) None of the components are listed.

ISHA article 118 (Harmful substances requiring permission) None of the components are listed.

Exposure Limits of Chemical Substances and Physical Factors

The following components have an OEL:

Hydrochloric acid

ISHA Enforcement Regs None of the components are listed.

Annex 19 (Exposure standards established for harmful factors)

ISHA Enforcement Regs None of the components are listed.
Annex 21 (Harmful factors subject to Work Environment Measurement)

ISHA Enforcement Regs None of the components are listed.
Annex 22 (Harmful Factors Subject to Special Health Check-up)

Standard of Industrial Safety and Health Annex 12 (Hazardous substances subject to control) None of the components are listed.

B. Regulation according to Chemicals Control Act

Article 11 (TRI) None of the components are listed.

Article 18 Prohibited (K-Reach Article 27) None of the components are listed.

Article 19 Candidate substances subject to authorization (K-Reach Article 25) None of the components are listed.

Article 19 Subject to authorization (K-Reach Article 25) None of the components are listed.

Article 20 Toxic Chemicals (K-Reach Article 20) Not applicable

Article 20 Restricted (K-Reach) None of the components are listed.
Article 27)

Article 39 (Accident Precaution Chemicals)

Not listed.

MoE 2021-51 - Regulations on the quantity of toxic substances, restricted substances, prohibited substances and permitted substances

| Ingredient name | Higher regulated quantity | Lower regulated quantity |
|---|---|--------------------------|
| Hydrochloric acid | - | - |
| Existing Chemical Substances Subject to Registration | The following components are listed: Hydrogen chloride | |
| C. Dangerous Materials Safety Management Act | Not available. | |
| D. Wastes regulation | Dispose of contents and container in accordance with all local, regional, national and international regulations. | |

E. Regulation according to other foreign laws

Article 2 of Youth Protection Act on Substances Hazardous to Youth Not applicable.

International regulations**Chemical Weapon Convention List Schedules I, II & III Chemicals**

Not listed.

Montreal Protocol

Not listed.

Stockholm Convention on Persistent Organic Pollutants

Not listed.

Rotterdam Convention on Prior Informed Consent (PIC)

Not listed.

UNECE Aarhus Protocol on POPs and Heavy Metals

Not listed.

Inventory list

| | |
|--------------------------|---|
| Republic of Korea | All components are listed or exempted. |
| United States | All components are active or exempted. |
| China | All components are listed or exempted. |
| Japan | Japan inventory (CSCL): All components are listed or exempted. Japan inventory (ISHL): Not determined. |

Section 16. Other information

- A. References**
- B. First issue date** 29 December 2018
- C. Date of issue/Date of revision** 29 December 2018 / 20 January 2026
- D. Version** 1.03
- Date of printing** 20 January 2026
