

# SAFETY DATA SHEET

New Zealand

Section 1. Identification

**Product name** B2-microglobulin, human 50 µl; part of

'Getting Started Biacore T200'

**Catalogue Number** 28980886

Chemical name Human β2-microglobulin

Other means of identification Not available. **Product type** Liquid.

Identified uses Analytical chemistry. Laboratory chemicals

Scientific research and development

Consumer use

Supplier

Cytiva Cytiva New Zealand

Amersham Place Buddle Findlay, Level 18, Pricewaterhousecooper Tower, Little Chalfont 188 Quay Street,

Auckland, Auckland, 1010 Buckinghamshire

HP7 9NA United Kingdom New Zealand

+44 1494 508000

Person who prepared the SDS:

Emergency telephone number (with hours of operation)

sds author@cytiva.com 0800 733 893

(10am - 7pm)

Section 2. Hazards identification

**HSNO Classification** Not classified.

Percentage of the mixture consisting of ingredient(s) of unknown hazards to the aquatic

environment: 75%

This material is not classified as hazardous according to criteria in the Hazardous Substances (Hazard Classification) Notice 2020.

**GHS** label elements

Signal word No signal word.

**Hazard statements** No known significant effects or critical hazards.

**Precautionary statements** 

Prevention Not applicable. Response Not applicable. Storage Not applicable. Disposal Not applicable.

Other hazards which do not

result in classification

None known.

Page: 1/8

# Section 3. Composition/information on ingredients

Substance/mixture Mixture

Chemical name Human β2-microglobulin

Other means of identification Not available.

There are no ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

#### Section 4. First aid measures

#### **Description of necessary first aid measures**

Inhalation Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical

attention if symptoms occur.

Ingestion Wash out mouth with water. If material has been swallowed and the exposed person is conscious,

give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical

personnel. Get medical attention if symptoms occur.

Skin contact Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get

medical attention if symptoms occur.

Eye contact Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check

for and remove any contact lenses. Get medical attention if irritation occurs.

#### Most important symptoms/effects, acute and delayed

#### Potential acute health effects

Inhalation No known significant effects or critical hazards. Ingestion No known significant effects or critical hazards. Skin contact No known significant effects or critical hazards. Eye contact No known significant effects or critical hazards.

#### Over-exposure signs/symptoms

Inhalation No specific data. No specific data. Ingestion Skin No specific data. **Eves** No specific data.

# Indication of immediate medical attention and special treatment needed, if necessary

Specific treatments Not available

Notes to physician Treat symptomatically. Contact poison treatment specialist immediately if large quantities have

been ingested or inhaled.

Protection of first-aiders No action shall be taken involving any personal risk or without suitable training.

See toxicological information (Section 11)

# Section 5. Firefighting measures

### **Extinguishing media**

Suitable Use an extinguishing agent suitable for the surrounding fire.

Not suitable None known.

chemical

Specific hazards arising from the In a fire or if heated, a pressure increase will occur and the container may burst.

**Hazardous thermal** decomposition products No specific data.

Hazchem code Not available.

Special precautions for fire-

fighters

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire.

No action shall be taken involving any personal risk or without suitable training.

Special protective equipment for

fire-fighters

Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus

(SCBA) with a full face-piece operated in positive pressure mode.

#### Section 6. Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

For non-emergency personnel No action shall be taken involving any personal risk or without suitable training. Evacuate

surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or

walk through spilt material. Put on appropriate personal protective equipment.

For emergency responders If specialised clothing is required to deal with the spillage, take note of any information in Section 8

on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

**Environmental precautions**Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

Inform the relevant authorities if the product has caused environmental pollution (sewers,

waterways, soil or air).

#### Methods and material for containment and cleaning up

Small spill Stop leak if without risk. Move containers from spill area. Absorb with an inert material and place

in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Large spill Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses,

basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Dispose of via a licensed waste disposal contractor. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in

container for disposal according to local regulations.

# Section 7. Handling and storage

#### Precautions for safe handling

Protective measures Put on appropriate personal protective equipment (see Section 8).

Advice on general occupational

hygiene

Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Conditions for safe storage, including any incompatibilities

Store between the following temperatures: 4 to 8°C (39.2 to 46.4°F). Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

# Section 8. Exposure controls/personal protection

### **Control parameters**

#### Occupational exposure limits

None

#### **Biological exposure indices**

No exposure indices known.

Appropriate engineering

controls

Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

**Environmental exposure** 

controls

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

#### **Individual protection measures**

Hygiene measures

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.

# Skin protection

Hand protection

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

**Body protection** 

Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Other skin protection

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Article Number 28980886-1

Respiratory protection

Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

# Section 9. Physical and chemical properties and safety characteristics

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

Physical state Liquid. Colour Colourless. Odour Odourless **Odour threshold** Not available. pН Not available Not available. Melting point/freezing point Boiling point or initial boiling Not available.

point and boiling range

Flash point Not applicable. **Burning time** Not applicable. **Burning rate** Not applicable. **Evaporation rate** Not available. **Flammability** Not available. Lower and upper explosive Not available.

(flammable) limits

Vapour pressure Not available.

> Vapour Pressure at 20°C Vapour pressure at 50°C

kPa Method kPa Method Ingredient name mm Hg mm Hg

water 17.5 2.3

Relative vapour density Not available. Relative density Not available. Solubility in water Not available. Miscible with water Yes.

Partition coefficient: n-octanol/

water

Not applicable.

**Auto-ignition temperature** Not available. **Decomposition temperature** Not available. SADT Not available.

Viscosity Dynamic (room temperature): Not available.

Kinematic (room temperature): Not available. Kinematic (40°C (104°F)): Not available.

Flow time (ISO 2431) Not available.

Particle characteristics

Median particle size Not applicable

# Section 10. Stability and reactivity

Reactivity No specific test data related to reactivity available for this product or its ingredients.

**Chemical stability** The product is stable.

Possibility of hazardous

reactions

products

Under normal conditions of storage and use, hazardous reactions will not occur.

Conditions to avoid No specific data. Incompatible materials No specific data.

Hazardous decomposition

produced.

Under normal conditions of storage and use, hazardous decomposition products should not be

# Section 11. Toxicological information

#### Information on likely routes of exposure

Inhalation No known significant effects or critical hazards. Ingestion No known significant effects or critical hazards. Skin contact No known significant effects or critical hazards. Eye contact No known significant effects or critical hazards.

### Symptoms related to the physical, chemical and toxicological characteristics

Inhalation No specific data. Ingestion No specific data.

Skin contact No specific data.

Eye contact No specific data.

#### Delayed and immediate effects as well as chronic effects from short and long-term exposure

#### **Acute toxicity**

Not available.

Conclusion/Summary[Product] Not available.

#### Skin corrosion/irritation

Not available.

Conclusion/Summary[Product] Not available.

### Serious eye damage/eye irritation

Not available.

Conclusion/Summary[Product] Not available.

# Respiratory corrosion/irritation

Not available.

Conclusion/Summary[Product] Not available.

#### Respiratory or skin sensitization

Not available.

Skin

Conclusion/Summary[Product] Not available.

Respiratory

Conclusion/Summary[Product] Not available.

# Potential chronic health effects

General No known significant effects or critical hazards. Inhalation No known significant effects or critical hazards. Ingestion No known significant effects or critical hazards. Skin contact No known significant effects or critical hazards. Eye contact No known significant effects or critical hazards. Carcinogenicity No known significant effects or critical hazards. Mutagenicity No known significant effects or critical hazards. **Developmental effects** No known significant effects or critical hazards. Fertility effects No known significant effects or critical hazards.

**Chronic toxicity** 

Not available.

Conclusion/Summary[Product] Not available.

### Carcinogenicity

Not available.

Conclusion/Summary[Product] Not available.

#### Germ cell mutagenicity

Not available.

Conclusion/Summary[Product] Not available.

#### Reproductive toxicity

Not available.

Conclusion/Summary[Product] Not available.

#### Specific target organ toxicity (single exposure)

Not available.

#### Specific target organ toxicity (repeated exposure)

Not available.

#### **Aspiration hazard**

Not available.

#### **Numerical measures of toxicity**

### **Acute toxicity estimates**

N/A

# Section 12. Ecological information

Ecotoxicity

No known significant effects or critical hazards.

#### Aquatic and terrestrial toxicity

Not available.

Conclusion/Summary[Product] Not available.

#### Persistence/degradability

Not available.

Conclusion/Summary[Product] Not available.

#### **Bioaccumulative potential**

Not available.

### **Mobility in soil**

Soil/water partition coefficient

Not available.

Other adverse effects

No known significant effects or critical hazards.

# Section 13. Disposal considerations

# **Disposal methods**

The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.
